

Veeam support for VMware vSphere 6.5

Veeam® offers innovative and practical solutions to help IT professionals better protect and manage their virtual infrastructures. We continually enhance our products and ensure compatibility with new operating systems and hypervisor releases. This document provides information about compatibility of Veeam products with VMware vSphere 6.5.

Our goal is to provide compatibility with current platforms as well as support new platform releases as quickly as possible. Therefore, when our customers have completed their planning and testing and are prepared to upgrade to a new platform release, our products will also be ready.

Note: Timing and content of future releases are subject to change without notice.

Product	Version	Notes
Veeam Backup & Replication™ <i>All editions (paid and free)</i> <i>All packages (standalone and suites)</i>	9.5	Update 1; fully supports vSphere 6.5
Veeam Management Pack™ for System Center	8.0	Update 3; fully supports vSphere 6.5

Frequently asked questions (FAQs) — Veeam Backup & Replication

Q: Does the current version of Veeam Backup & Replication support VMware vSphere 6.5?

A: Yes. Veeam Backup & Replication 9.0 provides support up through VMware vSphere 6.5.

Q: Do Veeam Availability Suite™ and Veeam Backup Essentials™ support VMware vSphere 6.5?

A: Yes. Both Veeam Availability Suite and Veeam Backup Essentials support VMware vSphere 6.5.

Q: Is there a fee for upgrading to the most recent version of Veeam Backup & Replication and Veeam ONE™?

A: Customers who are current on maintenance may upgrade to 9.5 and download and install all patches free of charge.

Frequently asked questions (FAQs) — Veeam Management Pack for System Center

Q: Does the current version of Veeam Management Pack for System Center support VMware vSphere 6.5?

A: Veeam Management Pack (MP) 8.0 Update 3, for System Center, provides full support of VMware vSphere 6.5.

Q: What enhancements are included in Veeam Management Pack 8.0 for System Center?

A: Enhancements for VMware vSphere environments include:

- Support for VMware vSphere 6.5
- Veeam Morning Coffee Dashboard® and Report — At-a-glance, real-time status of your virtual infrastructure including physical hosts, VMs, storage and overall resource utilization
- Hybrid cloud capacity planning reports for VMware vCloud Air
- Detailed snapshot and checkpoint tracking
- Enhanced vCenter alarm monitoring

Q: Is there a fee to upgrade to Veeam Management Pack 8.0 Update 3, for System Center?

A: Customers who are current on maintenance are eligible to upgrade to the version 8.0 Update 3, free of charge. For more information, see the [Veeam MP Licensing FAQs](#).
